†Recommended engine oil grades for cars operating in low temperatures:
For constant outside temperatures of between 0°C and 22°F C. (32°F F.) use a 10W/30 grade oil.
For constant outside temperatures of -23°C. (-10°F F.) and below, use a 5W/20 grade oil.

*Also approved any Dexron Transmission Fluid.

#First preference.

Section D2

PERIODIC LUBRICATION AND MAINTENANCE

When carrying out service schedules reference should be made to the Service Schedule Manual publication number T.S.D. 4117.
Section D3

LUBRICATION OF THE STEERING LINKAGE JOINTS

Suspension
The suspension requires no lubrication as all joints are pre-packed sealed units, although it is possible to renew the seals if damaged (see Chapter H - Sub frames and Suspension).

Steering
Lubrication of the steering linkage joints is accomplished through six grease nipples (see Fig. D1).
The grease nipples should be lubricated with the approved grease every 12,000 miles (20000 km.) or 12 months.

FIG. D1 STEERING JOINT LUBRICATION
