* Early Levelling System

Vehicles fitted with the early levelling system can be converted to a later levelling arrangement using the conversion kits identified in the table.

Note:

As there is a variation in operating characteristics between the early and late type height control valves, the new valves must be fitted in car sets only.

A

- | | |
|--------------|-------------------------------|
| 1. GMF1033 | ASSY G VALVE |
| 1. CD6223GMF | SERVICE KIT-G VALVE |

| 3. GMF1181 | BRAKE HOSE-FRONT |
| a 3. GMF1323 | BRAKE HOSE-FRONT |
| 4. CD5738 | BLEED SCREW |
| 5. UG2427 | DUST CAP |

Warning
Use only hydraulic system mineral oil (LHM) to replenish the braking and levelling systems. Do not use brake fluids (CastrolRR363, Universal, or any other type). The use of any type of brake fluid, even in very small amounts, will necessitate extensive rectification to the braking and levelling systems. Always ensure when purchasing hydraulic system mineral oil (LHM) that the supplier is fully aware of your requirements. Do not accept brake fluids even those marked Universal. Mineral oil (LHM) available in 1/2 litre containers. Part Number UT13741PA.

Avertissement

Utiliser uniquement de l'huile minérale pour systèmes hydrauliques pour remplir les systèmes de freinage et de mise à niveau. Ne pas utiliser de liquides pour freins (Castrol RR363, Universal ou tout autre type). L'utilisation de ces liquides pour freins, même en petites quantités, nécessitera une révision importante des systèmes de freinage et de mise à niveau. Lors de l'achat d'huile minérale pour systèmes hydrauliques, toujours s'assurer que le fournisseur soit bien au courant de vos besoins. Ne pas accepter de liquides pour freins, même ceux de marque Universal. L'huile minérale (LHM) pour freins est disponible en récipients de 1/2 litre, pièce n° UT 13741PA.

Warnung

Zum Auffüllen von Brems- und Niveauregelanlagen nur Mineralöl für Hydraulikanlagen (Hydraulic System Mineral Oil - LHM) verwenden. Keine Bremsflüssigkeiten (Castrol RR363, Universal oder andere Sorten) verwenden. Die Verwendung irgendeiner Art von Bremsflüssigkeit, selbst in geringen Mengen, macht umfassende Überholungsarbeiten an Brems- und Niveauregelanlage erforderlich. Beim Kauf von Mineralöl für Hydraulikanlagen (LHM) immer sicherstellen, daß dem Händler Ihr Bedarf genau bekannt ist. Keine Bremsflüssigkeiten annehmen, selbst wenn sie mit Universal bezeichnet sind. Mineralöl (LHM) ist in 0,5-Liter-Behältern erhältlich. Teil-Nummer UT 13741PA.

Avvertenza

Per rabboccare i sistemi di frenata e livellamento usare solo olio minerale per impianti idraulici (LHM). Non usare fluidi per freni (Castrol RR363, Universal o qualunque altro tipo). L'uso di qualunque tipo di fluido per freni, anche in quantità molto piccole, richiederà estese rettifiche ai sistemi di frenata e livellamento. Quando si acquista olio minerale per impianti idraulici (LHM), assicurarsi sempre che il fornitore sia a conoscenza delle vostre esigenze. Non accettare mai fluidi per freni anche se sono contrassegnati Universal. Olio minerale (LHM) è disponibile in contenitori da 1/2 litro. Numero di catalogo UT 13741PA.

Advertencia

Utilice solamente hidraulic system mineral oil (LHM) para rellenar los sistemas de frenos y de reglaje de la altura. No utilice líquidos de frenos (Castrol RR363, Universal o de cualquier otro tipo). El uso de cualquier tipo de líquido de frenos, aunque sea en pequeñas cantidades, provocará la necesidad de reparar los sistemas de frenos y de reglaje de la altura. Al adquirir el hydraulic system mineral oil (LHM), asegúrese siempre que el proveedor entienda completamente cuáles son sus requisitos. No acepte líquidos de frenos aunque lleven el indicativo Universal. Mineral oil (LHM) está disponible en envases de 1/2 litro. Numero de pieza TU 13741PA.
