

1 Modulator (anti-locking brakes)	11 Lower distribution valve
2 Front leading brake caliper (twin cylinder)	12 Deceleration conscious pressure limiting valve ('G' valve)
3 Front hydraulic pump	13 Priority valve
4 Front hydraulic accumulator	14 Filter block assembly
5 Rear hydraulic pump	15 Minimum pressure valve
6 Rear trailing brake caliper (twin cylinder)	16 Levelling valve
7 Rear hydraulic pump	17 Seepage return hose
8 Hydraulic pressure warning switches with bleed points	18 Bleed point - Suspension struts
9 Hydraulic mineral oil reservoirs	19 Rear brake caliper (four cylinder)
10 Upper distribution valve	20 Rear brake caliper bleed point
21 Restrictor	21 Gas spring and Suspension strut
22 Gas spring and Suspension strut	22 Anti-locking brakes warning panel
23 Anti-locking brakes electronic control unit (ECU)	23 Anti-locking brakes warning panel

Mineral oil hydraulic system colour coding and component location - Left-hand drive cars

- A Feed to rear brakes and levelling (System 1)
- B Deceleration conscious pressure valve fed rear brakes (System 1)
- C Low pressure return from front levelling and rear brakes (System 1)
- D Feed to front brakes (System 2)
- E Deceleration conscious pressure valve (System 2)
- F Front brakes (System 2) and directly fed rear brakes (System 1)
- G Low pressure return from front brakes (System 2)
